PROFILE

I am a highly educated recent arrival to the United States. After acquiring my Bachelors in Chemical Engineering and MBA, I gained experience working in government and consulting. I am also familiar with a range of computer software and speak good English. After having to leave the workforce in 2021 when the Taliban took over in my country, I am excited to begin working again so that I can continue to use the skills I have developed and start building my life in the US.
